The business model

You manage the clients, we build the websites. Clients pay monthly, you build a residual income.

It's not often that you can claim to make money while you sleep, but that's exactly what an it'seeze website franchise offers you once you've established your business!

Having supported our business partners for more than a decade, our business model has grown over time.

- + Your clients pay an initial setup fee and monthly price plan, giving you both instant and residual income.
- + Our team of professional designers and experienced developers create the websites.
- + Enhance your profits by providing additional digital marketing services.
- + We save you time by handling all invoicing and technical support.

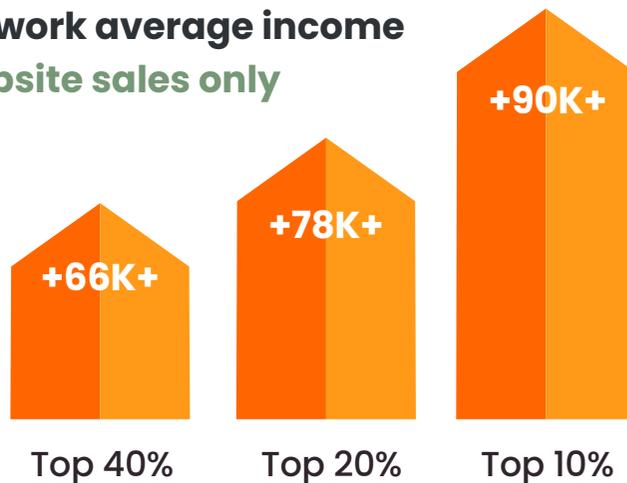

Some business partners choose to work alone, while others have grown a team after establishing a strong reputation. **The choice is yours:** this is a flexible business that puts **you** in control.

Your investment

Because this is a scalable business model, your returns are determined by your effort: the more you put in, the more you get out.

As a guide, the Top 20% of it'seeze business partners enjoy an average income of over £78,000 per annum, while the average across all Franchisees trading for at least 12 months is more than £45,000 per annum (excludes additional services).
